

Drinking Water Filter Twin Under Sink

FILTERIFIC

HIGH PERFORMANCE SYSTEM

HP Twin Under Sink has been designed with high quality, low cost filter replacements in mind:

- Filter 1- Removes dirt and rust. 1 micron polyspun sediment filter cartridge.
- Filter 2- Removes chlorine, lead, bacteria, cysts, bad taste and odour. 0.5-micron activated carbon filter cartridge. Tested and certified by the NSF. (National Sanitation Foundation-International)
- Filter housing tested to Australian Standards 3497

Running cost for an average family is \$60 per year ie. to keep the water filter running effectively the filter cartridges need to be replaced once per year, after the initial set up of the filter system.

CONTAMINANTS FILTERED

Chlorine
Dirt
Rust
Herbicides
Pesticides
Lead
