

## **FILTERIFIC**

The following test report confirms yet again the Seagulls IV's superior performance, completely removing harmful bacteria found in toilet waste:

### **E.Coli and Coliforms**

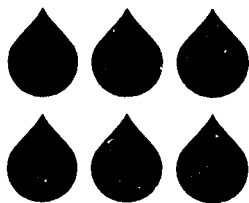

The Australian Water Quality Centre put the Seagull IV through the ultimate test, they purified sewer water. High readings of the contaminants E.Coli and Coliforms were present in the water, and after it was purified through the Seagull IV purifier the result was ZERO E.Coli and Coliforms present!

A break through in drinking water purity!

Results of the analyses of water samples collected on 12 July 2000 and received at the Australian Water Quality Centre are attached. (Report No: R027195).

The results indicate that the sample filtered through a SEAGULL IV-X/IFB unit complied microbiologically with the Australian Drinking Water Guidelines (1996) for indicator organisms E.Coli and Total Coliforms.

An account is enclosed.

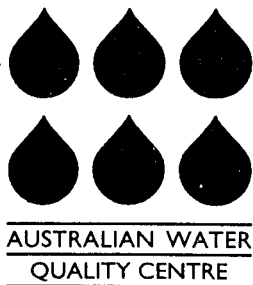

Yours faithfully
