Mr. Richard T. Williams, President  
General Ecology, Inc.  
151 Sheree Blvd.  
Exton, PA 19341

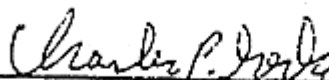

Dear Mr. Williams:

Enclosed is the final report on our evaluation of three Seagull® IV X-1 drinking water purification systems according to the U.S. Environmental Protection Agency Guide Standard and Protocol for testing Microbiological Water Purifiers.

As indicated in the report, the Seagull® IV X-1 systems passed the EPA Guide Standard for all three classes of microbiological contaminants exceeding the recommended removal levels of bacteria (*Klebsiella terrigena*, 99.9999%), protozoan cysts (*Cryptosporidium* cysts, 99.9%), and enteric viruses (poliovirus and rotavirus, 99.99%).

Carlos Enriquez, Ph. D  
Assistant Research Scientist

Charles P. Gerba  
Professor
